

# SKIMMING SPATULAS WITH ALUMINIUM HANDLE

Skimming spatulas are an ultra-flexible spatulas made from a very fine grade of steel. The rounded edges and tapered blade allows the user to easily get into corners, whilst the ergo frame molded handle allows for effortless use and is easy on the joints. Skimming spatula can be used for finishing and smoothing both walls and ceilings of plaster and special finishes. Due to the variety of sizes, the time of the plastering process can be cut down, allowing you to use your time more efficiently.
