# PAINT ROLLER CLEANER

Catalog number 030 335

The **PAINT ROLLER CLEANER** was designed to allow you to clean various sizes of paint roller up to 250 mm length and pile up to 120 mm using water pressure to spray and spin roller. You can use your roller several times, saving time, labor, and material costs. It also saves you the awful mess and hassle of cleaning your roller cover by hand. Prepare the cleaner. If you do not have access to a waste water drain, use a round bucket with a capacity of 10 liters. Use the slot on the cover. Connect the garden hose using included 1/2 inch connections. You can also connect cleaner with shower hose. While washing, move the nozzle with the water stream, to evenly clean the roller.

## VERSATILE

A washer that you can easily use to clean most paint rollers available on the market.

## EASY TO USE

All you need for cleaning is access to a hose with running water and a bucket. It can be a garden or shower hose.

## INGENIOUS

The washer's lower mountings fit most round 10-liter paint and plaster buckets.
