CLAMP CUTTING GUIDE WITH EXTENSION

motive

LONG LOCKING HANDLE

ADJUSTABLE CLAMP END

OPTIONAL EXTENSION

This clamp cutting guide is perfect for accurately cutting straight lines when using routers, saws or jigsaws. The guide can be clamped onto the work piece with one hand and is guaranteed to be straight - no more using clamps and a straight edge to guide your power tool. Because the guide is clamped from below the work piece there will be no obstructions above, and the high clamping strength means that the clamp will not move during use.
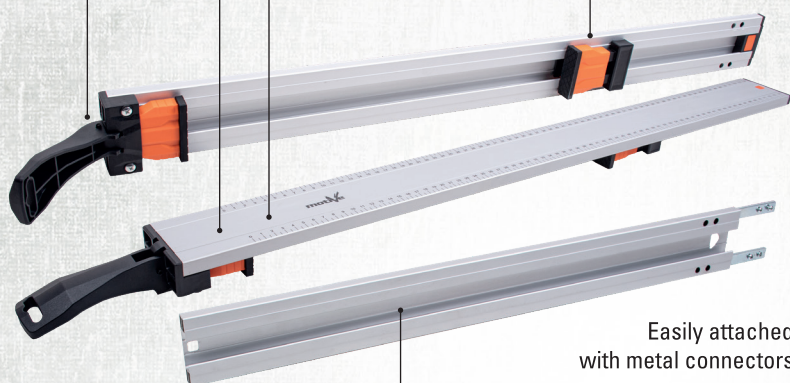

With the new optional extension, any of the three clamp edge sizes can be expanded by an additional 625 or 1250 mm.

Convenient and quick clamp for one-handed operation

8 cm wide and sturdy profile from heavy gauge extruded aluminum

Ruled extrusion allows for easy measurements

Soft-grip non-marring rubberized clamping pad, securely grips all surfaces

Easily attached with metal connectors
