

# GEL KNEE PADS

NEW IN OFFER

**KNEE PADS** are an essential for anyone who have to spend periods of time working on their knees. The gel knee pads provide protection to your knees when working in a kneeling position even when kneeling on rough or surfaces with lots of building debris on them. Typical applications include kneeling on uneven surfaces, laminate flooring, roofing work, concrete screening, laying patios and general gardening work. These gel knee pads feature air injected technology and a comfortable gel foam padding that supports the knee, a stabilizer cap provides a comfortable and sturdy supported kneeling position.
