

STEPPED DRILL BIT

**HSS
4341**

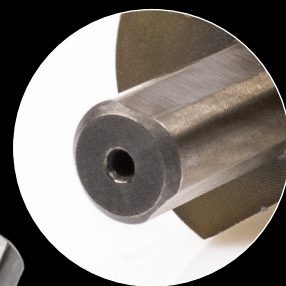

**HARDNESS
62-65 HRC**

**TITANIUM
COATED**

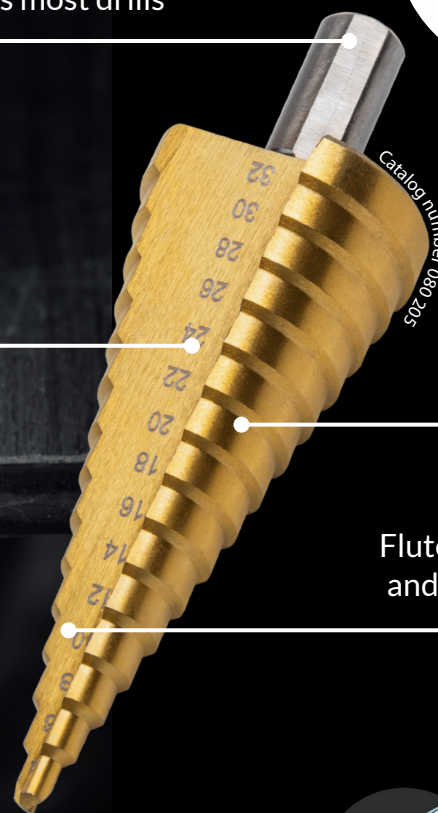

The drill bit is coated in titanium for extra strength and durability to last through the toughest projects. The drill bit has step sizes ranging from 4 mm to 32 mm. This 15 step drill bit features a split point tip that prevents sliding and walking during increased drilling speeds.

It also has easy-to-read hole sizes to quickly analyze the needed bit depth, and dual-flute cutting edges that helps lower friction and heat production for hassle free drilling applications. The step drill bit is ideal for enlarging holes in **thin metal, plywood, drywall, and particleboard.**

Flat sided round shank fits most drills
